

Building a Better SR 520

4-Lane Alternative

Cost Range: \$1.7 — \$2.1 billion

**Cost estimates based on full funding and construction starting in 2008.*

Project Benefits

Safety and Reliability

- Builds new bridges to current standards, reducing risk of damage during earthquakes and storms
- Adds shoulders to provide access for emergency vehicles and allow vehicles to pull off to the side during accidents or breakdown

Transportation

- Moves 7% more people in 13% fewer vehicles than today's roadway in 2030

Stormwater Treatment

- Treats stormwater throughout the corridor, improving water quality. Currently, stormwater is not treated along the corridor

Noise Reduction

- Adds sound walls, reducing noise in communities

Connectivity

- Adds new regional bicycle/pedestrian path across Lake Washington
- Removes "ramps to nowhere" near Arboretum

SR 520 Bridge Replacement and HOV Project
